Download and Reading

4.1 Functions

· Support for online reading
· Separate readers for web pages
· Support for batch download
· Up to 22 downloads at a time

The article directory of the journal where the literature is located will be displayed on the left side of the page.

4.2 Downloading and Reading Methods

After selecting the required documents, you can read online or download them.
(1) Clicking on "download"
The webpage will automatically download in a new window.
The webpage provides tools to read PDF files or convert them into Word documents.
(2) Clicking on "online reading"
The webpage will directly display the required document in a new window.
The left side of the page displays the table of contents for the articles in the journal where the document is published.

Detailed Guidelines For Using Wanfang Database

WANFANG

01

About the Wanfang Database

Overview: Developed by Wanfang Data, the Wanfang Database is a substantial online information provider, encompassing various scholarly resources such as journals, dissertations, conference proceedings, and other academic products. As a professional academic database in China, it rivals the China National Knowledge Infrastructure (CNKI) in scope and quality, offering a wealth of information for researchers and scholars.

02

Access

2.1 Access Link Entry

(1)Wanfang Data Knowledge Service Platform
Website: www.wanfangdata.com.cn

(2)English Website of Wanfang Data
Website: www.wanfangdata.com

(3)Overseas Wanfang Data in Traditional Chinese Characters
Website: g.wanfangdata.com.hk

2.2 Access and Registration

2.2.1 Login

① To log in, click on the 'Register/Login' option at the homepage's top right corner.

② Login by using a password, SMS verification code, or third-party account.

③ Third-party account login can be realized by WeChat, Sina Weibo, QQ account, off-campus access, and the China Science and Technology Cloud Authentication Alliance.

④ Successful login is confirmed once these steps are completed.

2.2.2 Registration

① Click on the 'Register/Login' option at the top right corner of the homepage.

② Select the "Quick Registration" option.

③ Fill in your username, password, mobile phone number, and verification code.

④ Agree to the service terms by checking the box.

⑤ Successful registration is confirmed once these steps

2.2.3 Off Campus Access

① Open the "Wanfang External Access System" at https://fsso.wanfangdata.com.cn/.

② On the "External Access System" page, click on the "Institution Name" input box, and enter "Southeast University" or select it from the list, and then click "Go."

③ Enter your campus network account and password (Your username is your employee ID or student ID number, and the initial password is the last six digits of your citizenship ID card).

④ Check the service agreement

⑤ Successful login is confirmed once these steps are completed.

03

Retrieval

3.1 Search method

(1) Quick Search

Type keywords into the search box to perform a regular search. Select your search scope, such as full text, title, author, etc.

(2) Advanced Search

Advanced search features two methods: cross-database search and search by discipline.
Advanced search is segmented into three areas: search, literature type selection, and search history. Retrieval can be conducted by combining search terms, such as title and author, institution and publication date, etc.Achieve more precise retrieval by using logical operators like AND, OR, NOT.

3.2 Search Results

Search interface is divided into three sections: Overview, Result Sorting, and Search Field.
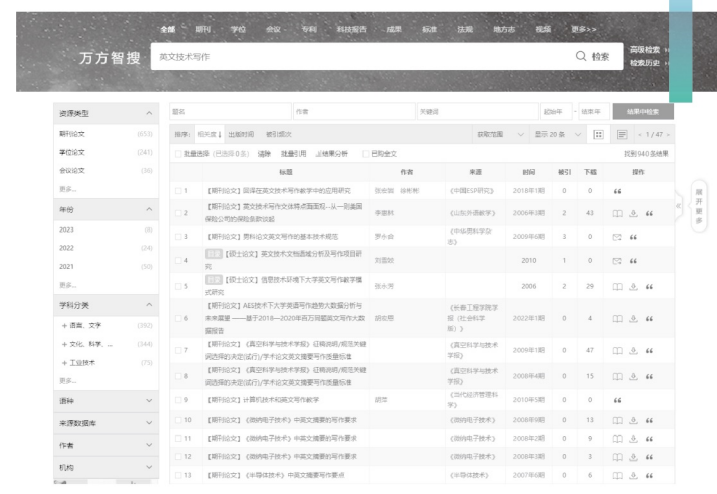

(1) Overview Area is the place to browse the search results, displaying document type, source, author, abstract, and keywords of the search results. It also shows the indexing status of the source journal and the citation frequency of the searched document.

(2) Result Sorting Area functions to sort the search results by relevance, publication date, citation count, etc.

overview area

3.3 Sorting and Filtering Search Results

When we sort and filter the search results through Wanfang database, there are two methods. The first is to filter the search results by resource type, year, subject, language, database, author and institution on the left side of the search results page. The second one is at the top of the search results page, which is to filter by entering title, author, keyword and year, and to sort by relevance, publication time and citation frequency.

3.4 Secondary Search

Wanfang Database provides three forms of secondary search: directly modifying the search expression, clustering, and narrowing the search scope for a new search. The common method is to enter the title, author, keyword and year at the top of the search results page for a second search.
